

General Format for Writing Task 1

1. Introduction (rephrasing the rubric)

Starting	Presentation type	Verb	Description
The provided	graph, chart, table, pie chart, bar graph, line graph, process diagram, map, illustration, diagram, picture	depicts, provides	the comparison of data on..... ...的比较

2. Overview/General Trend: containing no figures or data: write overall trend:: mention all categories:: include what the graph is all about

Looking from an overall perspective, it is readily apparent that....

显然的

EXAMPLE: Looking from an overall perspective, it is readily apparent that there was an increase in the percentage of people who ate vegetarian meals once a month and several times a year, whereas all other categories saw a decrease. NOTE: when categories have longer names use "all categories" to replace the other groups, mentioning all categories "names" will not help you get a high score.

BODY PARAGRAPHS:

explain the important points and data for each group or categories

describe the graph in a logical way (start at the beginning, middle, end)

look for similarities and differences in comparing the categories

3. Body 1

As the data suggest,

正如数据所显示的

4. Body 2

Turning to ...

转向(相对转折)

USEFUL ACADEMIC VOCABULARY. A. Vocabulary to show changes:

Trends	Verb form	Noun form
Increase	rise, increase, go up, uplift, climb, upsurge, soar, improve, move upward, soar	a rise, an increase, an upward trend, an improvement, a jump, a leap, a climb
Decrease	fall, decrease, decline, plummet, plunge, drop, reduce, dip, deteriorate, collapse	a fall, a decrease, a reduction, a decline, a drop, a downfall, a collapse
steadiness 稳定/不变	unchanged, level out, plateau, remain stable	a steadiness, a plateau, a stability, a static
standability/Flat 平稳的	leveled off, remained constant, plateaued, stayed uniform, remained the same	n. 高原/稳定时期 保持相同
Gradual Increase		an upward trend, an upward tendency, a ceiling trend
Gradual decrease		a downward trend/ tendency, a descending trend

A.1 Vocabulary to represent changes in graphs (line and bar graph)

大量的, 可变的

Type of change	Adverb form	Adjective form
Rapid change	dramatically, rapidly, sharply, quickly, swiftly, significantly, noticeably, considerably, substantially	dramatic, rapid, sharp, quick, significant, considerable, noticeable, substantial
Moderate change	moderately, gradually, progressively, sequentially	moderate, gradual, progressive, sequential
Steady change	steadily, ceaselessly	steady, ceaseless
Slight change	slightly, slowly, mildly, tediously	slight, slow, mild, tedious

A.2 Vocabulary to represent frequent change in graphs (line and bar graph)

Type of change	Verb form	Noun form
rapid ups and downs	wave, fluctuate, oscillate, palpitate	waves, fluctuations, palpitations, oscillation

A.3 Types of changes/differences and vocabulary to present (pie chart and table)

changes/differences	形容词性的 adjective form	副词性的 adverb form
great change / huge change 大变化	overwhelming, substantial, enormous	overwhelmingly, substantially, enormously
big change / big difference 大差异	significant, considerable	significantly, considerably
medium change / moderate change	somewhat, moderate	somewhat, moderately
minor change / small difference	fractional, marginal, slight	fractionally, marginally, slightly

B. Vocabulary to represent highest and lowest points in graphs (line and bar graph):

Type	Verb	Noun
highest point	peaked, culminated, reach the peak, hit the peak, touch the highest peak	a/the peak, a/the pinnacle, <u>the highest point</u> , a/the summit
lowest point	touch the lowest point, get the lowest point, reached the nadir	<u>the lowest point</u> , <u>the lowest mark</u> , bottommost point, rock bottom point, the lowest level, the bottom

B.1 Vocabulary to represent comparison in graphs

Type	word(s) should be used
similar	about, almost, nearly, <u>roughly</u> , approximately, around, just
just over	just above, just bigger, just beyond
just short	just below, just beneath, just under, just a little
much more	well above, well beyond, well over
much less	well below, well under, well short, well beneath

折线图若看量
线外用 below
于中间用 about

C. Other Important Language/Structure ::: **apply these structures when doing homework or writing practice****Transitions** 过渡/转变

1. The Middle East produces high levels of oil; however, Japan produces none.
2. The USA produces large amounts of natural gas. In contrast, South Korea produces none.
3. European countries make great use of solar power. On the other hand, most Asian countries use this method of power generation very little.

Subordinating Conjunctions 从属连词

- ad 下级的次要的
n 下属
1. The Middle East produces high levels of oil, whereas/while Japan produces none.
 2. Whereas/While the Middle East produces high levels of oil, Japan produces none.
 3. Although the Middle East produced 100 tons of oil, Japan produced none.

verb + adverb

1. The consumption of chocolate fell steadily.
2. The development of new products fell gradually.
3. The quality of food in supermarkets has increased slowly.

there is/was a + adjective + noun

1. There was a steady fall in the consumption of chocolate.
2. There was a gradual decline in sugar imports.

more/fewer + noun + than

1. More males than females chose the TV.
2. Fewer females than males selected the bicycle.

comprised/accounted for (useful before stating the actual figure)

1. Energy production in France comprised 6% hydropower and 24% of nuclear power in 2010.
2. In 2010, hydropower and nuclear power accounted for 6% and 24% of energy production in France, respectively.
3. According to the graph, the number of coffee drinkers in Sydney accounts for approximately 57%.

totaled/in total/the total number of/the total amount of

1. The number of cars produced in Japan totaled around 9 million last year.
2. The total number of cars produced in Japan last year stood at around 9 million, outnumbering the USA at 7 million.

3. In total, 300,000 iPhones were manufactured in the last quarter of 2016.

4. The total amount of electricity produced in the first half of 2016 was around 2 million kilowatts.

Comparison Structure

The percentage of + {specific group 1} + in + {location} + is significantly lower/higher than that of + {specific group 2}, + particularly in + {specific details on difference}.

Example: The percentage of women in the workforce is significantly lower than that of men, particularly in managerial and executive positions.

Increase/decrease structure

The number of + {variable} + increased/decreased + by + {figure/amount} + between + {year} and {year}, reaching a total of + {total number/amount}.

Example: The number of international tourists visiting the country increased by 100,000 between 2018 and 2019, reaching a total of 5 million visitors.

Fluctuation structure

The + {variable} + fluctuated between + {range} + throughout the year (from...to...) + with + {additional details}.

Example: The average temperature in the region fluctuated between 20 and 25 degrees Celsius throughout the year, with the highest temperatures occurring in the summer months.

The average temperature in the region fluctuated between 20 and 25 degrees Celsius from January to July, with the highest temperatures occurring in the summer months.

Proportion structure

The proportion of + {specific group} + in + {variable} + increased/decreased from + {percentage} in {year} to {percentage} in {year}.

Example: The proportion of women in managerial positions in the company increased from 35% in 2018 to 45% in 2020.

Forecasting structure

It is expected/projected/anticipated that + {variable} in + {location} will {increase/decrease/stay the same} by {percentage/amount/number} by/in {exact year}.

Example: It is expected that the demand for renewable energy in Taiwan will increase by 50% by the year 2025.

A graph in the future

-always check what time frame is being referred to

-time frame may include the past and the future or possibly only the future

-common structure you can use to discuss a graph in the future:

<u>will + infinitive</u>	is/are expected to + infinitive,
is/are predicted to + infinitive	is/are projected to + infinitive
is/are anticipated to + infinitive	is/are set to + infinitive

Example: The number of female fitness members **will increase** in the next 5 years by almost a quarter.

The number of visitors in London Science Museum **is anticipated to plummet** in 2026 at 40 per cent.

Examples of how you can change percentages to fractions or ratios:

Percentage	Fraction	Percentage	Fraction
80%	four-fifths	40%	two-fifths
75%	three-quarters	35%	more than a third
70%	seven in ten	30%	less than a third
65%	two-thirds	25%	a quarter
60%	three-fifths	20%	a fifth
55%	more than half	15%	less than a fifth
50%	half	10%	one in ten
45%	more than two fifths	5%	one in twenty
